dual champion

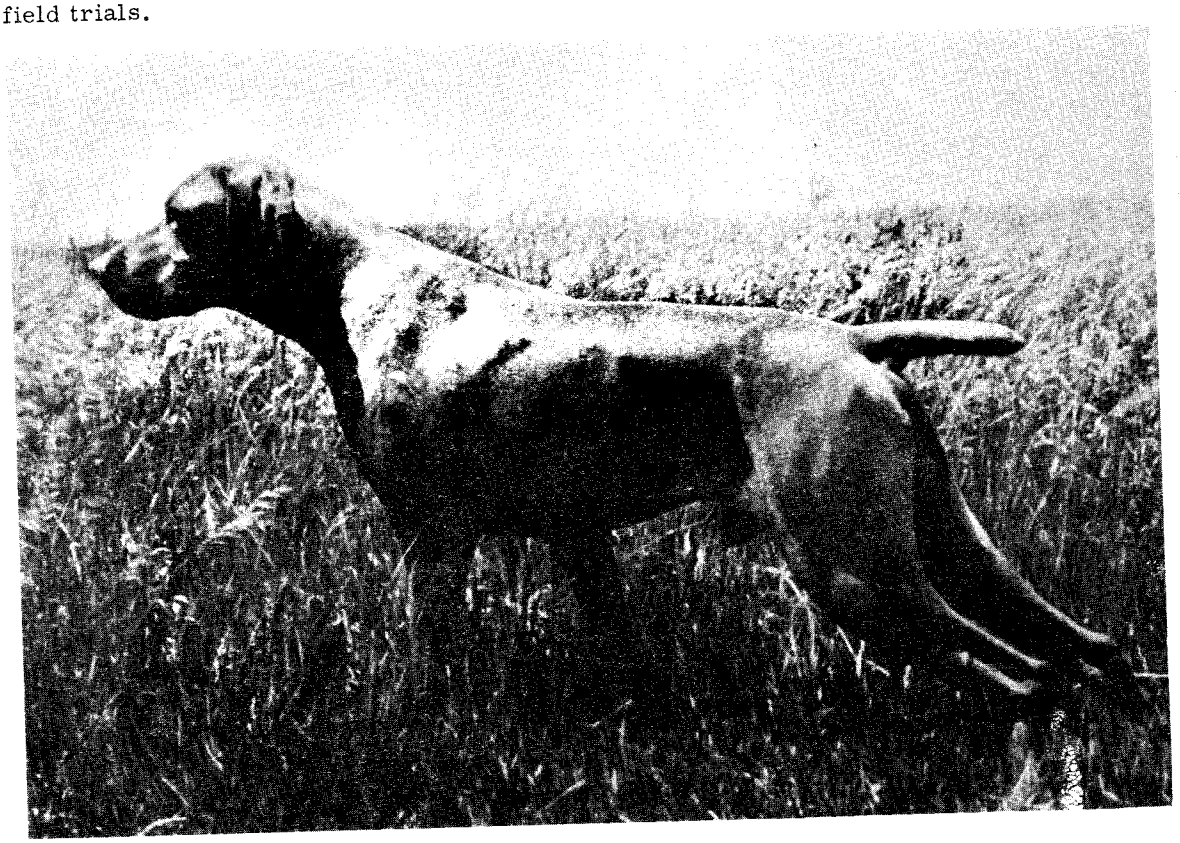
Pictured is Dual Champion Bobo Buck Selle. He finished his Bench Championship at the Badger Kennel Club, Madison, Wisconsin, June 28, 1970, under Judge Donald Sandberg. Bobo Buck Selle was shown on the bench only seven times garnering four majors, under a different judge for each win, for the needed 15 points. His wins were: Nebraska Kennel Club in Omaha, 4 points; Cedar Rapids Kennel Club, Cedar Rapids, Iowa, 5 points; Danville, Illinois Kennel Club, 3 points; Badger Kennel Club, 3 points.

Bobo Buck Selle was handled by Miss Sally Heald of Lincoln, Nebraska for his first win and by Mrs. Irma Gibson of Omaha for his other wins.

Bobo finished his Field Championship April 4, 1970 at the VCOA National Baldwinsville, New York. Field wins are as follows:

GSHP Club of Nebraska	1st Open Derby	Spring 1967	2 points
VCOA National	1st Open Derby	Fall 1967	2 points
GSHP Club of Nebraska	1st Open Gun Dog	Spring 1969	3 points
VCOA National	1st Amateur Gun Dog	Fall 1969	4 points
VCOA National	1st Open Gun Dog	Spring 1970	5 points

Bobo's sire is Dual Champion FUTAKI DAROCZ, his dam is KONYA V SELLE. Dr. R. C. Reinhardt of Scottsbluff, Nebraska is the breeder. He is owned by Sylvester M. Armstead, 3626 South 120th Street, Omaha, Nebraska. Who is his handler for all field trials.



b.i.c.

Some time ago the Breed Improvement Committee was requested to investigate and report on Cryptorchidism in the Vizsla breed. Acting on this request a letter of inquiry was sent to sixteen schools of Veterinary Medicine. The following three questions were included in each letter:

(1) Have you or your school had any experience with the Vizsla breed relating to Cryptorchidism?
(2) Do you believe that cryptorchidism (unilateral or bilateral) should be of any great concern to breeders of purebred dogs?
(3) Do you believe that a program could be set up to control this defect? If so, could you make recommendations as to the procedure which a national breed organization might follow.

Responses were received from eight of the sixteen colleges, and the following is a summary of the information contained in these reponses.

First, just what is Cryptorchidism? According to current literature a crytorchid animal is a male in which one or both of the testes have failed to decend into the scrotum. The term "monorchid" has been commonly applied to the dog inwhich one testicle is retained within the body and the other testicle has decended, but monorchid actually means having only one testicle - - an entirely different condition. The proper description of the animal with retained testicles is cryptorchidism bilateral (both retained), or cryptorchidism unilateral (one retained and one decended).

Cryptorchidism is regarded by most authorities to be a developmental defect which is inherited. The mode of inheritance has not been established beyond-the-shadow-of-a-doubt. The most quoted theory now is that it is not a simple sexlinked sutosomal recessive but involves at least two genes. Bilateral Cryptorchids are sterila because the sperm cannot develop at the temperature within the body, but requires the lower temperature of the scrotum. Unilateral cryptorchids are fertile and according to most of the letters should be regarded as the real threat to the increase of the condition.

All of the respondents to our letter, except one, reported having a very limited experience with the Vizsla breed, and only the University of Minnesota had actually observed a case of crytorchidism in the breed. There is apparently no statistical data available, at least in this country, on the incidence of this condition in the Vizsla. Most writtersimply that cryptorchidism is probably about the same in all breeds, however an article sent by the University of Washington states that it is most common in dwarf breeds and breeds with short skulls (bulldog types).

Without exception, the responding schools agreed that the cryptorchid dog should be regarded with concern by breeders and breed organizations. Three general reasons were given: first, simply that it is a defect to the perfect dog and should be eliminated if possible; second, the retained testicles have an increased susceptibility to neoplasm (particularly the sertoli cell tumor); and third, being an inherited defect it would probably tend to become more prevelent if not controled by proper breeding.

None gave specific information on whether the condition has ever been observed to increase within a breed if left uncontrolled breeding program was used.

A number of suggestions were made for control programs - - "education of breeders", "do not use cryptorchid males as breeders", "withhold registration on any litter sired by a cryptorchid", "physical examination before shows", "remove both parents of any cryptorchid dog from the breeding population", and "do not breed cryptorchids or their litter mates".

Dr. Smith of Colorado State University submitted the following inheritance pattern for cryptorchidism:

1. Normal & Normal - 100% normal
2. Normal & Carrier - 50% normal and 50% carriers
3. Cryptorchid & Normal - 100% carriers
4. Carrier & Carrier - 25% normal, 50% carriers, 25% cryptorchids
5. Carrier & Cryptorchid - 50% carriers and 50% cryptorchids

Dr. Leighton of the Univeristy of California states that "this defect will appear more commonly where much inbreeding occurs".

CONCLUSIONS AND RECOMMENDATIONS:

Based on Dr. Simth's table of inheritance patterns, we could conclude that:

1. The obervance of cryptorchid progeny indicates both parents are carriers or cryptorchid.
2. The obervance of a cryptorchid in a litter indicates that at least a percentage of his litter mates are carriers.
3. An apparently normal appearing litter could by up to 100% carriers.
4. Elimination of the cryptorchid (unilateral) males only from breeding will not necessarily prevent the increase of the condition.

Genetic improvement with a sex limited trait, such as this, should be expected to be only half as rapid as when both sexes show the trait, i.e. dysplasia.

Because this is a visible defect whieh is easily seen and diagnosed and because the incidence of the condition is apparently very low on the Vizsla breed, it is the opinion of this Committee that responsibility for the control of the condition must be placed with the individual breeders. It is flet that it would be of little or no benefit to attempt to establish a registry of known cryptorchids, but that the VCOA should promote an educational program to keep breeders aware of the condition and of new developments as they become available.

The Breed Improvement Committee recommends that:

1. Cryptorchid males should not be used for breeding.
2. Litter mates (male and female) of cryptorchids should not be used for breeding.
3. Neither parents of cryptorchid dogs should be used for rebreeding.
4. Surgical assistance, massage, hormones or other injections should not be used in an attempt to bring the testicles in their normal position.

We further recommend that all VCOA members make a concerted effort to get the forgoing information to all breeders, and to encourage sound breeding practices in their areas.

From the Treasurer

The responce to the new sticker "THINK VIZSLA" has been so good I'm ordering more. I want to thank all of you who waited patiently for me to send yours to you. The first ones I had printed did not hold up against the weather like the printer said they would. By the time I got another company to print them I was already three weeks behind in sending them out.

Memberships due in October.

ON THE COVER

Ch. Brook's Amber Mist
Owner: Anthony J. Lucas
Breeder: J. H. Cuthbertson
Sire: Ridgeland's Copper Gypsy
Dam: Ridgeland's Olca Selle

"Amber" was awarded Best of Breed at the 1970 National Specialy Show. She is extremely happy and classy in the shows and field trials. We were very pleased with her win, but more pleased just that she could be there. Just 4 1/2 weeks before the show Amber was hit by a car and was hospitalized with collapsed lungs and pnemonia.

In 1969 Amber won Best of Breed at the Revera KC Show - the Saturday before the specialty show at Chagrin, Ohio.

On Sunday "Amber's" daughter Ch. Timarka's Tsindee of Amber was awarded Best of Breed. This year Ch. Timarka's Tsindee of Amber got the Best of Breed on Saturday and "mom" had to do it on Sunday.

The Vizsla Club of Southern California held its first AKC Sanctioned Match in Placentia, Calif. on July 5, 1970. We had an entry of 27 Vizslas (15 puppies and 12 adult dogs). We also had 10 Junior Handlers in competition. Class winners received lovely rosettes. The Best Puppy and Best Adult in match received rosettes and beautiful walnut and silver trophies topped by the figure of a pointing Vizsla.

Our first match was very successful and we're hoping for an even bigger entry for our next one. The next sanctioned match will be held in about 6 months and will also include obedience competition. Plans are underway now for our first AKC Sanctioned Field Trial to be held in September.

from our president

The Fall National Trial seems to be pretty well setup and ready to go on October 23, 24, & 25. We are planning to run the Futurity on Friday the 23rd then have the Board of Directors meeting after the running of the Futurity, this meeting will be held at the Colonial Inn Motel and Restaurant 5600 Cornhusker Highway, Junction of US Highways 6 and 77 in the Northeast corner of Lincoln, Nebraska. For those of you who can come earlier the Nebraska Vizsla Club will be holding their Fall Trial on the preceeding weekend October 17 & 18 using the same motel for headquarters and the same grounds for the trial. You all come. Bob Ekeler 4310 Sunset Lane, Columbus, Nebraska 68601 is Field Trial Secretary for the Nebraska Trial.

Anyone having any of the Traveling Trophies in their possession is asked to PLEASE return them to the Vizsla Club of America % Bill D. Fisher, 1421 North 11th Street, Beatrice, Nebraska 68310 before the Fall Trial or bring them to the trial with you. The Board of Directors are to decide on what is to be donw with these trophies. I hope that we can start using them again, but we sure won't be able to unless we receive all of them back. So anyone that knows the whereabouts of any of the Traveling Trophies is urged to make every effort to get them returned to the Club.

Anyone that has anything that they think should be brought before the Board is welcome to send a request to me and I will try to get it before the Board. All Board Members are your representatives and should have knowledge of what the General Membership wants done and why. So let the Board know your feelings. All committee chairman are supposed to have a report of their committees action ready for the Board Meeting, preferably in the hands of the President and Secretary by October first. If we can have these reports and requests ahead of time it will give us a chance to plan a better meeting. Hopefully one that will not take until midnight to finish as some have in the past.

Only three Regional Governors have replied to my request as to who the officers are in the local clubs. I was sure that we had more than three local clubs, maybe som just do not have officers. If we have some Regional Governors that do not want to serv as such I wish they would let me know so we can try and find someone that is willing to do the job. If this club is going to move forward we need active people in these positions. I have filled a couple of the Regiona Governor jobs that were vacant RG from Illinois Is Phillip W. Rosenberg, 202 South Beverly, Wheaton, Illinois and from Nebr. it is Jane Graff Rt #3 Seward, Nebraska.

VIZSLA CLUB OF CENTRAL NEW ENGLAND
from Carole Smith

The VCCNE held its spring field trial at the Crane Wildlife Management area at Falmouth, Massachusetts on the weekend of May 16 and 17th. There was an entry of 86 dogs with the breakdown as follows: 41 Vizslas, 19 German Shorthairs, 17 german Wirehairs, 6 Irish setters and 3 Gordon Setters.

The skies held back on us all day Saturday and half of Sunday, but finally would no longer be contained. There were a few soggy entrants in the Amateur Gun Dog Stake, which concluded the trial at 5:30 p. m. on Sunday, but the prevailingly high spirits helped carry them through.

Vizslas took eight out of the twenty placements. The judges were Frank Arno, Jim Jenkins, and John Moran with Dick Yonda competently filling in as judge in our Open All-Age stake, as it started earlier than anticipated. The marshalls included Valerie Dupuy, Carl Richey and Dick Yonda. Field Trial Chairman was Sam Horowitz and Field Trial Secretary, Charles DuPuy.

Special thanks go to the Field Trial Committee who helped so much to make the trial the success that it was!

CALIFORNIA

The Vizsla Clubs of Southern and Northern California supported the entry in the benched show at Santa Barbara on July 26, 1970. We drew an entry of 43 Vizslas to be judged by Dr. Erno Kubinzsky of Budapest, Hungary. Dr. Kubinzsky does not speak English and so the ring directions were quite animated and at times confusing to the exhibitors. The examination of the dogs was lengthy and thorough with an emphasis on gaiting. The results of the judging were as follows:

Puppy, Dogs 6-9 mo: Sageacre Voros Kutya V Tazsar/C. & P. Hatch
Novice, Dogs: Hood's Count Koppertone/ E. S. Hood
Bred by Exhibitor, Dogs: El-Jo's Country Squire/J. &.E. Saldivar
American Bred, Dogs: Charles Todd's Rusty/C. Todd
Open, Dogs: Debreceny Elemer/M. &D. Carpenter
Puppy, Bitches 6-9 mo: Rotkopf's Regina of Sageacre/B. Stephenson & V. Fowler
American Bred, Bitches: Rotkopf's Amber Sparkler/R. &B. Stephenson
Open, Bitches: Tartary Zsoka/ W. & V. Crawford
Stud Dogs: Ch. Markos Von Debrecen/F. Kasparek
Brood Bitches: Ch. Tartary Lulu/ W. &V. Crawford
Brace Class: H. & J. Van Alstyne's Brace

BB: Ch. Debreceny Dezso/G. Carpenter
BOS. WB: Tartary Zsoka
WD BW: Debreceny Elemer

We tried to use this show as a "dry run" for the 1971 National Specialty. All arrangements and activities went well--our only hope for next year is a much larger entry. We all owe Chairman, Barbara Stephenson a big thank-you for all the work on this show.

LOOKING FOR A WINNER ?

Only two pups left (1 ea sex) from litter born July 4 by F. C. Jodo Red ex Ripp Barat's Bundle. Three dogs of previous litter born 7-1-68 (same breeding) have already netted twelve placements (see recent breed publication's writeups for their exploits). This litter should be better. Pups show excellent promise for field and show and are nominated for VIZSLA FUTURITIES of 1971.
