VIZSLA HEALTH
1988 NATIONALS UPDATE
FINAL TOP TEN STATS FOR 1987

Beat the Heat!

BILL GIBBONS and MAGMA Bird Dog Training operating out of Westside Pet Center want to remind you that Summer is just around the corner, and we are already preparing for our *Summer Training Camp*. If you are interested, please call now and reserve a place for your dog, as we have a limited amount of time, and space available.

Whether it be starting the young pup, or getting the experienced dog in shape for the coming season, call now and make a reservation.

We train at *Sunrise, Arizona* in the White Mountains. At an elevation of 9,000 feet, this is a real cool place to spend the summer.

Dogs should be brought in or shipped to us by the *First of June*. We will be in the Mountains until the middle of September.

RESOLUTION

The VIZSLA NEWS is the official publication of the Vizsla Club of America, Inc. It is published for the entertainment and education of club members. With the exception of official Club business from the President, Board of Directors, and Committee Chairmen, only letters and articles of entertainment and education will be printed. Material that is contrary to the goals and policies of the American Kennel Club and the Vizsla Club of America, Inc. or that criticizes or is detrimental to members of the Club, dogs, or the judging of dogs, will not be printed. This policy is not to be construed as forbidding opposing viewpoints or constructive criticism. If the Editor considers a member's article or letter to be in opposition to this policy or detrimental to the Club image, and after discussion with the contributor, an agreement cannot be reached regarding the content, the Editor will refer the matter to the Vizsla News Committee for resolution. All items submitted are the property of the Club and will remain on file for possible future use. If a member desires that pictures be returned, they must be accompanied by a self-addressed, stamped envelope.

Postal Information
The **VIZSLA NEWS** is mailed second class within the first two weeks of each month and takes approximately 1 to 3 weeks to arrive. First class mail is available for an additional $8.00 per year. There is an additional assessment for postage on any mailing outside of the United States, Canada, or US protectorates: First class — $8.00; Air Mail delivery — $15.00 — most European countries (printed matter 1 to 2 weeks), all other countries — $20.00.

Payments
Fees for advertising in the **VIZSLA NEWS** are payable in advance of the first month of publication, if yearly rate applies, or at time of submission of materials for all other ads.
All monies due must be made payable to the Vizsla Club of America in United States funds. Ad fees and postage should be sent to the attention of the Editor.

ON THE COVER

From Russet Leather Ranch, land of the great Indians comes...

Flash: Cowboy No. 1 Vizsla First Quarter CC System.

CH RUSSET LEATHER CAVEAT KIOWA

(CH Rotkpof's Super Charger CD JH VC OFA VZ1515
X CH Russet Leather Fire Mt. Spirit OFA VZ2029)

This young Charger son, not yet two, has been shown 19 times in '88, winning 15 Best of Breeds, one Group I and two Group IIs. A special "Thank You" to all the "cowboy fans" for your support and encouragement.

Sharyn Baker, Editor

Paw-Pourri

It was inevitable, but what a way to do it! There are now three Vizsla Master Hunters, and would you believe all three finished on the same day! Not only that, but all three dogs were bred by and handled by amateurs. All three are Dual Champions and two Amateur Field Champions. Warmest congratulations to Joe Manning and Dual/AFC Randy Bee's Ramblin Man, Terry Lucas and Dual/AFC Semper Fi Chesty Puller and Mike Parks and Dual Ch. Golden Empire's Beauregard CD. Be sure to see the write-ups in the field section for additional information on this Vizsla first.

After all the sad, bad news in the March/April issue, I'm really pleased to have good things to share with you.

"Rex" our Star Search and Rescue dog from the last issue has completed his TD. Did anyone doubt for a minute he would be denied? congratulations Rex and Max - will there be a TDX in your future?

Marlene Chumbook sent information about Project Pup — Pets Uplifting People. It didn't arrive in time to be printed in the March/April issue, but so what, I'm sharing it with you now. I wish there had been some way I could have reproduced the newspaper photograph that accompanied the "Sun" article. Imagine, if you will, a circle of senior citizens in wheel chairs surrounding "Indian" and "Turkey" Vizslas with costumed Mike Chambers, young son of one of the Vizsla owners, with his gun at the ready. We have all read how rewarding these programs are and isn't it nice to know we've members willing to share their time and Vizslas with others in such a creative fashion. Pet Therapy works!

On a more serious note, I've included letters and information from Bob and Marylee Sloane, AKC Delegate Al Lucas, and AKC President Ken Marden. Please take the time to look these items over carefully. One way or another we're all affected by their outcome.

The 1987 Final Top 10 statistics for Show, Field, and Obedience are included in this issue. Congratulations to those who made the various lists. It indicated a lot of hard work, dedication and $. I also wish to thank those three special gals who take the time to read all the AKC fine print to produce this information for you. Thanks, Pat, Arlene and Debby!

The Conestoga Vizsla Club is well into its preparations for the 1988 Nationals. They have provided an extensive listing of Nationals information. It's not too soon to start making your plans.

The July issue will be our membership and education issue. All VCA recognized clubs are invited to prepare a one page synopsis about its organization. Please be sure to include the officers, a current mailing address, and the name of your membership person. You're welcome to add additional information, as space allows, but it must all be on *one* page.

Finally, please note all the puppy ads in this issue. There will be some fine babies here soon. If you know of anyone looking for a little love with a lot of potential, I'm sure these breeders would appreciate your referral.

Until July

Sharyn

THE 1, 2, 3'S OF ADVERTISING IN THE VIZSLA NEWS

There have been some inquiries on how to place an ad in the News. The following is designed to help answer your questions.

1. What do I do First?

Decide on the size of ad that best suits your information and your budget. Decide into which issue of the News you want your ad placed. Remember we work 2 months ahead. Mail your ad to us, as an example, no later than Jan 15 for the March issue.

2. What do I include?

Always send the name of your dog, his OFA# or if the dog is under 2, inlcude the OFA numbers of his parents. Remember, no male Vizsla can be advertised for stud until he has his own OFA number.

Also include your name on all items to be returned, especially pictures. Be sure to write the name of your dog on the back of his photo. Send a stamped envelope for return of your photo.

If your ad is for puppies, how many do you have available, and what sex. If they haven't arrived, the due date.

For winning ways, the place, date, and significance of the win. Listing the sire and dam of your winning dog just takes up space. The more words you use, the smaller the picture.

3. How do I set up my ad?

Type or print the text you want on the page. Draw a diagram of how you would like the text placed respective of your photo. Include instructions on how much of the photo is to be used. (Most ads just include the dog.)

4. To whom do I send my ad?

Send all of your information plus your check, made out to the VCA,to the editor. There is no need for you to go to the expense of priority mial if you plan ahead. If you have to mail something in a hurry, call us for instructions. We would hate for you to go to the expense of priority mail if we were unable to be there to receive it. Just plan ahead!

5. How is my ad placed in the News?

Primarily full and half page ads are categorized according to the type of information provided. A show ad would be placed behind the Show Top 10 in that section, an obedience ad behind the Obedience Top 10 and so forth. An ad for puppies, unless you indicate otherwise, will be placed at the editors discression. Winning Ways are placed to help break-up the text of the articles.

6. What ad space is available to me?

You can have your ad almost anywhere, provided you plan ahead. The front cover is always popular and booked months in advance. There are alternatives to being on the front: Inside Front, Inside Back, Back, and the Centerfold, plus the regular pages exclusive of the VCA Information section. Always consult the advertising page for the current ad rates.

7. What if I need to change something at the last minute?

Call us! There maybe a chance the change can be made or additional information added. But don't be too upset, if your ad is already at the printer.

8. Finally we want to be attentive to your needs. If you have a question please call before you mail. We want you to be satisfied with the money you've spent. But please remember, we are only volunteers. We must work the news around jobs, homes, kids, dog school, shows, field trials, etc. Don't expect miracles - but we'll try our best.

Sharyn

ADVERTISING AND SUBSCRIPTIONS

ADVERTISING RATE SCHEDULE EFFECTIVE JANUARY 1988

Front Cover:	Plus one inside page with no restrictions on number of words used	**$75.00**
Back Cover:	Includes one photo	**$60.00**

REPORT OF THE DELEGATE

The AKC board of directors voted in March to support the legal efforts of the American Dog Owners Association's Canine Defense Fund to defeat breed-specific vicious dog legislation. The AKC will match all contributions from individuals, clubs and other organizations to the ADOA Canine Defense Fund retroactive to January 1, 1988.

An increase of individual and litter registration fees of $1.00 was announced. Other highlights of the annual Delegate's Meeting included approval of a proposal to allow changes to the By-Laws at any quarterly Delegate's Meeting rather than solely at the March Annual Meeting. The following members were elected to the Board of Directors:

Class of 1989 - Elizabeth C.B. Higgins
Class of 1992 - Louis Auslander
Elaine Young
Walter Goodman

Prior to the meeting several seminars were offered. One of the most impressive dealt with misconduct at AKC events. An excellent video tape on the subject accompanied the presentation and is available from AKC upon request. The video will be available for viewing at this year's VCA Nationals in October.

Al Lucas
AKC Delegate

From the Breed Improvement Chairman
Florence Knudsen

The Vizsla Club of America, Inc.

TO: VCA MEMBERS
FROM: CHAIRMAN, BREED IMPROVEMENT COMMITTEE

May I take this opportunity to remind you that the Vizsla Club of America adheres to a policy of x-raying our Vizslas before breeding to determine the absence or presence of hip dysplasia. Only those Vizslas that show no evidence of hip dysplasia should be used for breeding purposes. Although breeding only clear dogs has not totally eradicated hip dysplasia there is strong evidence that it is the best line of defense.

Most veterinarians can take a hip x-ray, not all of them can read them accurately. Often a vet will say that the hips are excellent, while the OFA will rate them as good. Your vet may think he sees signs of dysplasia and the OFA may give the dog a number. The Vizsla Club of America will accept only the ratings of the OFA. These are sent to the Breed Improvement Chairman on a quarterly basis and are kept on a computer file.

The VCA strongly recommends that you wait until your Vizsla is two years old before breeding. At that time have your dog x-rayed and have the x-ray sent to the OFA for a reading. Do not breed the dog until you have received a reading from the OFA which gives your dog a number and certifies the dog is free of hip dysplasia. If you wish to advertise a litter in the Vizsla News, YOU MUST SEND THE OFA NUMBERS OF THE SIRE AND DAM TO THE EDITOR. Any Vizsla appearing anywhere in the VCA News other than in a news article or Winning Ways must have an OFA NUMBER AT THE TIME THE AD IS PLACED. Our editor has a difficult enough job getting the VCA News out, so do not ask her to start researching because you have not included the OFA numbers. If you have lost your certificate from the OFA please contact me and I will look it up for you. When I receive the quarterly report from the OFA I computerize the list and send it on for publication in the VCA News. The information includes the dog's name, OFA number, the AKC#, the age at the time of x-ray, and the owner's name. It is no longer necessary to send me a copy of the certificate, but please do contact me if you see an error in the published information.

Lastly, booklets containing an alphabetical list of all Vizslas assigned BIC numbers and OFA numbers from 1961-1985 are available. This booklet was put together by Terry Lucas and it represents many hours of research, typing, editing, and collating. It is a valuable resource for every Vizsla owner. Contact me if you would like to purchase a copy.

Sincerely,

Florence Knudsen

THE AMERICAN KENNEL CLUB

KENNETH A. MARDEN
PRESIDENT

March 25, 1988

Dear Club Secretary:

The current rash of proposed and in-place breed-specific vicious dog ordinances represents a nationwide threat to all dog owners.

The American Kennel Club has launched an intensive campaign to oppose such legislation by providing individual dog clubs and dog club federations with a wealth of support materials designed to help them in their battle against discriminatory ordinances, as well as testimony in critical cases. Our efforts to date have focused on opposing proposed legislation and replacing it with strong vicious dog laws that are non breed-specific, enforceable and penalize irresponsible dog owners.

Contesting breed-specific vicious dog legislation already in place is an expensive proposition. For the most part, funding for efforts to overturn discriminatory laws in the courts have been borne by the American Dog Owners Association's Canine Defense Fund. Despite the often substantial contributions by many AKC clubs, the fund is almost depleted.

On March 8, 1988, the AKC Board of Directors authorized the systematic donation of matching funds, equal to all contributions to the Canine Defense Fund retroactive to January 1, 1988. The significance of the AKC contributions depends, obviously, on the amount of club and individual donations.

Most clubs contribute generously to canine research, veterinary schools, the Humane Society, and other worthwhile dog causes. Because of the potential impact of landmark cases now in litigation, there is no cause more urgent or worthwhile than the Canine Defense Fund. Financial support is desperately needed to insure the success of litigation being pursued in California, Washington, Ohio and Kansas.

We request that all clubs consider donating a substantial portion of their discretionary funds to:

ADOA Canine Defense Fund
1654 Columbia Turnpike
Castleton, New York 12033

Your support is needed now!

Sincerely,

Kenneth A. Marden

Health Notes

by Dr. Doug Carithers, D.V.M.

Breeding, Pregnancy and Delivery... an Overview

I often get questions from dog owners on what to do before-hand and how to handle a pregnant bitch. The breeding itself is important to getting healthy pups, but this article is more concerned with the physical aspects of a brood bitch.

A prebreeding exam should be performed by your veterinarian during proestrus (the first 10 days of show before your bitch becomes receptive). The exam is basically a very complete physical. The body tone is checked, a fecal exam and heartworm check are performed. A pelvic exam for bony protrusions or other pelvic abnormalities is done. A vaginal exam including vaginal cytology is performed to check for signs of infection. Blood should be drawn and serum sent to a qualified diagnostic lab for *Brucella canis* testing. The prebreeding exam is also an excellent opportunity to get your bitches vaccinations up to date.

Usually at about 10 days into the "season," estrus begins. This is that period of time that the normal bitch's receptive to the dog. Sometimes the bitch will not be receptive at all, vaginal cytology and/or temperature monitoring will indicate the appropriate breeding time.

Initially the diet of a pregnant bitch shouldn't vary from normal. For the first 4-6 weeks feed intake should remain the same. The dog food should have a protein level of 25%. The food intake will increase dramatically after about 6 weeks. On average this will lead to about a 36% weight gain during gestation. Ideally your bitch should still be 5% over her normal weight throughout lactation.

Approximately one week prior to whelping one should introduce the bitch to the whelping box. The box should be clean, disinfected, and if wooden painted with lead-free paint. A child's wading pool makes an excellent whelping box. It is very easy to clean, strong and cheap enough it can be thrown away after use. It is important that the bitch be comfortable with the whelping box, so she'll not be nervous when whelping.

There are three stages to whelping. In stage one the bitch will be restless, pant and exhibit nesting behavior. This stage is often difficult to detect. Stage two is the actual delivery of the pups. This is normally completed in 4-24 hours. Stage three is the delivery of the placentae, which usually follows the delivery of every one or two pups.

There are many causes of Dystocia in the dog (difficult delivery). These dystocias can be grouped in three categories as to their cause: Inadequate size of the birth canal (boney callus, vaginal stricture or prolapse), absolute fetal oversize (single puppy, fetal monster or waterbelly pup), and inadequate uterine contractions (primary uterine inertia and secondary uterine inertia). Inadequate birth canal size and absolute fetal oversize are self explanatory, but inadequate uterine contractions might need explanation.

Primary uterine inertia is the condition where the time comes, and the bitch doesn't go into labor. The cervix dialates often there is a meconium (green) stained fluid discharge, but the bitch acts as if nothing is happening. As with inadequate size of the birth canal and fetal oversize, cesarian section is indicated with primary uterine inertia.

Secondary uterine inertia, failure to progress is characterized by a normal labor and delivery that suddenly stops. This has to be differentiated from an obstructive dystocia. IN the secondary uterine inertia the uterine contractions just cease. A physical examination and radiograph will differentiate fetal oversize from secondary uterine inertia can have medical options. Oxytocin, 3-20 unit IM can be given at 30 minute intervals. If no response is seen within 15 minutes of the second injection of oxytocin a solution of 10% calcium gluconate, 3-5 ml IV slowly may be given.

Dear Palo,

It was great getting together with you last year. All the kids are doing just fine. Three of the girls are working birds and the other two are being spoiled and having a ball with really neat owners. Of course Rick kept our only son, Zeke. Boy, that kid drives me nuts! Like father, like son I suppose. Rick takes him to conformation classes. Zeke's doing good, but we wonder about Rick. If Rick lives through conformation he's gona take Zeke to the birds (everybody around think's Rick's a little flighty already).

Anyhow, enough of that stuff. Why don't you talk to Lance & Barb and see if they'll cut you loose for my May heat! Another litter like last years would be great.

Well, that's it for now, Palo, see you in May

Love, Ruby

Weimaraners — Pyometra

Reprinted from the September 1986 issue of *Pure Bred Dogs/American Kennel Gazette*

There are few things that could be more disheartening or frightening than to find that your beautiful, top quality, future top producing bitch has pyometra.

Pyometra is a bacterial infection in the uterus. No one knows exactly how or why it occurs. When the bitch is in heat the cervix of her uterus is open and it is at this time that for some reason vaginal bacteria may move up and into the uterus (normally free from bacteria) and set up the infection. It is thought to result from persistant uterine stimulation by circulating plasma progesterone. The first sign of pyometra is uaually a yellowish vaginal discharge 2-4 weeks following the end of the bitch's heat (or 4-6 weeks following "standing estrus").

Untreated, the bitch with pyometra will become seriously ill. Other signs include anorexia, lethargy/depression, vomiting, drinking a lot of water and frequent urination. The bitch will also experience a good deal of discomfort or pain. There are some veterinarians who feel the antimating shot (a hormone which puts the bitch back into heat and prolongs the time the cervix is open) predisposes a bitch to pyometra. Consistent with this notion, some clinicians prescribe a ten day course of antibiotics after giving the antimating shot. Unfortunately, most bitches come down with pyometra for no known reason.

What can be done for pyometra? Traditionally, the only cure has been spaying; in fact, spaying was just about the only hope for saving the bitch's life. However, within the past 5-6 years, a new treatment has been developed and tested with good success. The treatment, which employs Prostaglandin F_2 alpha, is approved for cows and mares but not yet approved for use in bitches, so the treatment I shall describe is still experimental.

Upon the discovery of a vaginal discharge the bitch should be examined and cultured by a knowledgeable veterinarian. It is often difficult to make sense out of a culture from the pus. The causative organisms are usually the ones that are normally found in the bitch's vaginal tract. Such bacteria as *E. coli,* Staphylococcus, Streptococcus, Proteus, and others are commonly found on culture. If the veterinarian can get the sample to the laboratory quickly, then the percentages of bacterial growth may tell him which is the actual pathogen in the pyometra. On the other hand, if the culture is allowed to sit at room temperature for even an hour, the bacteria will overgrow and no valid information will be gained from the culture results.

(Continued on Next Page)

(Continued from Previous Page)

Here is where the owner of the bitch or a friend can assist by personally taking the culture to the laboratory for the veterinarian as soon as he takes the culture. The laboratory can also identify the antibiotics which will kill the infecting organism(s). When the veterinarian has established the presence of pyometra, the bitch is given an injection of Prostaglandin F_2 alpha (PGF_2a) using his judgement as to the best dosage. The bitch is also usually given an appropriate antibiotic. The PGF_2a is given daily until the vaginal discharge subsides; the antibiotic regimen continues for several days longer. PGF_2a causes vigorous constriction of the uterine muscle which, in turn, expresses the discharge (pus). Draining off the pus allows the antibiotic to penetrate the infected area (the lining of the uterus) and to kill off the remaining bacteria. Drainage is essential because antibiotics cannot penetrate pus.

An injection of PGF_2a causes an almost immediate reaction in the bitch—initially panting, restlessness, salivation, and pacing, followed by vomiting and defacation. These reactions are diminished or are gone entirely after 20 minutes. It is most helpful if the veterinarian has an area in the immediate vicinity of his office for the owner to take the bitch where he can walk her and talk to her during this difficult 20 minute period (a park or grassy area free of distractions is ideal).

I have been involved in several cases of pyometra, three of which were severe cases in top quality Weimaraner bitches. The cases are informative, but their reporting also serves to illustrate the value of a close working relationship between an breeder and actively concerned veterinarians. My thanks to Drs. Ann Beck, Keith Bryan, J.O. Shuler and Merrill Irvin for providing the care for these bitches and to Marcia Snyder and Linda Weick for providing their observations:

Sugar—a two year old maiden bitch whose heat ended early September (1983) and the vaginal discharge was noticed around the first of October. A white cell count (WBC) taken was 20,000/cu mm (normal range for dogs is approximately 8,000 - 11,000). Culture of the discharge showed a nearly pure culture of *Proteus vulgaris* which was sensitive to a number of antibiotics. On October 6, Sugar was given an injection of DES (diethylstil-bestrol — an estrogen-like substance) to reopen her cervix. The discharge became heavier that evening. On October 8, she began a series of PGF_2a shots (Lutalyse, Upjohn) at a dosage of 0.25 mg/kg which produced a better drainage, and she was started on 1,000 mg/day chloramphenicol. She received an injection of PGF_2a for 21 days as the pus continued to drain. This was a particularly difficult case because it was

(Continued on Next page)

(Continued from Previous Page)

advanced pyometra which did not respond well to the treatment. On October 16, her antibiotic was changed to Septra for one week. On October 22, her WBC was 41,800 and spaying was considered. On October 23, the antibiotic was changed to Keflex (Lilly) and after consultation with several other veterinarians, the PGF_2a dosage was doiubled to 0.50 mg/kg. This dosage was given for six more days. On October 26, the WBC showed the first decline at 37,500; on October 28, it was 24,000 and on November 2, it was 16,500. She came back into season five months later, was placed on Keflex (750 mg/day) and was bred but produced no pups. Her next heat came five months later, she was again put on Keflex, was bred and whelped a litter of seven healthy pups (five came normally and two were taken by Caesarian because of uterine inertia). As of this date, she has had no relapse of pyometra; however, she did not conceive in her next breeding in 1985.

Poppy—this three year old bitch had already produced one litter of ten pups in the previous year. Day one of her heat was July 7 (1985) and she was bred on days 10, 12 and 14. On July 30, she was taken to her veterinarian because of a brownish yellow vaginal discharge. No cultures were taken. She was given Keflex for four days (1,000 mg/day) with no improvement. The painful decision was made to begin PGF_2a shots, knowing it would abort her litter. PGF_2a shots were given at 0.25 mg/kg and she received one shot a day for three days. This produced good drainage and the Keflex was continued for a total of 14 days. The owners took Poppy on vacation and returned around September 1. On September 5, Poppy was taken back to the vet's office because she looked pregnant. Examination, including an X-ray, stunned the veterinarians as it revealed three live pups! With an unexpected litter due in two weeks, the owners got everything ready in a hurry. Poppy's rectal temperature dropped in the wee hours of September 19, but she did not go into labor. At 5:00 am on September 20th, she was still not in labor, but a dark green vaginal discharge was noted and she was rushed to the vet's office. She was given an oxytocin shot to begin labor in order to expel the pup from the birth canal. She whelped eight pups during ten hours that day but had to have three additional oxyticin shots to produce the necessary labor. Whether or not the previous PGF_2a treatment affected her labor is unknown. The "miracle litter" is now ten months old and healthy.

Felda—this maiden bitch's first heat was at 12 months. She came into heat again two months later. At the end of this heat, we were at a field trial in Maryland and noticed she was not feeling well, and saw the yellowish vaginal discharge. Two days

(Continued on Next Page)

(Continued from Previous Page)
later she was taken to our veterinarians where a culture and a WBC were taken. The culture revealed over 90% *Haemophilus parainfluenzae* and the WBC was 19,000/cu mm. She was started on 0.25 mg/kg PGF_2a injections, once a day for eight days, and 1,000 mg/day Keflex. Her WBC went up to 28,600. After the eighth shot of PGF_2a, her WBC fell to 19,100 and by the 12th day was 11,000. Her next heat, five months later, was "touch and go". She showed a worrisome brownish vaginal discharge and was put on Keflex at the same dosage for ten days. We were advised to breed her in her next heat or spay her. SHe came into heat five months later while at a field trial in California. She was shipped home and bred while on the same dosage of Keflex. She whelped a litter of eight healthy pups within two hours in April of this year.

These are three success stories. We are relieved to know that something CAN be done for pyometra. If the infection is noticed in time and if the veterinarians are up to date on the latest methods for dealing with this infection, it is possible to save a good bitch and produce healthy pups.

Dear VCA Members,

The Board of Directors of the Vizsla Club of America, at its meeting in October 1987 voted to have a frozen sperm catalog on Vizslas which would be made available to the general membership of the VCA. The information compiled in the catalog will include the dog's name, the owner, the OFA number, and the location of the frozen sperm. The catalog will be the responsibility of the BIC.

In this light, would you please submit the requested information to me if it pertains to your dog. I will compile the information quarterly and send it to the VCA News for publication.

Sincerely,

Florence Knudsen
Breed Improvement Chairman

March 1988 AKC Awards

(January through January 24, 1988)

GROUP AND BEST IN SHOW

POINTS ARE AWARDED FOR BEST IN SHOW OR GROUP PLACEMENT WINS ONLY

These results are the official ratings recognized by the Vizsla Club of America. Best in Show (BIS) dog earns one point for each dog in actual competition (absentee and Obedience dogs are not counted). First in Group (GR1) dog earns one point for each dog in the Group. Second (GR2), Third (GR3), Fourth (GR4) in Group earn one point for each dog in the Group, less the total number of dogs in the breeds that placed higher.

	BIS	1	2	3	4	BB	VD	TOTAL
1. Lyons' Brewster of Harann (D) Lyons					1	1	20	262
2. Ch Cariad's Surfstone Szuka (B) Corum, Gornoski & Wilson		1				4	68	197
3. Ch Copper Brok Rozsa (D) Lantz			1			2	0	93

VIZSLAS DEFEATED

POINTS ARE AWARDED FOR VIZSLAS DEFEATED (VD) IN BEST OF BREED (BB) COMPETITION

	BB	VD	AVG
1. Ch Cariad's Surfstone Szuka (B) Corum,Gornoski,Wilson	4	68	17.0
2. Ch Lone Juniper's Count Barat (D) Toadvin	4	28	7.0

"Murphy"

Murphy Kedves Vadasz

Owners: Carol & Dino Carozza

Breeders: Sherry & John Klein

On January 14, 1988, the Tampa Bay Vizsla Club held its first booster at the Manatee Kennel Club show. Acting as agent and advisor, I incorrectly entered the two Vizslas in the wrong classes (9-12 mos. puppy, when they should have been in 6-9 mos. puppy class). Consequently, Murphy Kedves Vadasz lost a 5 pt. major and Kedves Vadasz Deja Vu lost reserve winners. Murphy was proudly owner-handled that day and was very deserving of his win. I am sorry for the disappointment and embarrassment caused to his owner because of my error. Murphy is truly an outstanding Vizsla who undoubtedly will have great wins in his show career.

Sincerely,

Paul Gornoski

NEW CHAMPIONS

Taken form the 1988
AKC Gazette-Febuary through May

1. BOELTE'S BRONZE KEIRA (B) by Ch. Boelte's Brant of Penlee x Ch. Boelte's Bronze Beauty Breeder/Owner: Pat & John Boelte.

Up Coming in the News

July Membership Issue. Attention all VCA Clubs! This is your chance to let us know who you are and what you're all about. Please send me ASAP a one-page resume (typed would really be nice) including your current officers, (names and addresses) membership person, and a couple of paragraphs about your club. We will run extras of this issue for VCA Secretary Lynne Worth and Membership Chair Susie Goldberg to mail to both new and prospective VCA members. Please do your part by letting those interested in the VCA know where the local Vizsla Clubs are located. Thanks

February 17, 1988

Dear Sharyn,

I rather imagine that you already have received this article for publication in the NEWS. If you have...good. Bob and I feel that this pending Congressional Bill should be brought to the attention of the VCA membership. Hopefully, they will rally and respond to the Chairman of the committee and to their Congressman. This full page ad in The American Field was sponsored by The Ohio-Pennsylvania Shooting Dog Championship Club because they feel, as we do, that our sport of field trialing, and pleasure of hunting is being seriously threatened by this bill. We hope that you will reprint this and urge our members to respond.

Also enclose in another piece from The American Field. It is a response to a letter that had been written by Mr. Toney, who was complaining about the "big running" dogs. We feel that this response should be read by everyone who trials and especially those who judge our field trials.

Yours truly,

Bob + Marylee

Bob and Marylee Sloane

FIELD TRIALS MAY BE BANNED BY CONGRESS

Portions of the following article prepared by The Wildlife Legislative Fund of America appeared in the Nov.-Dec. issue of Quail Unlimited Magazine.

Congressional Bill Threatens All Hunting With Dogs

"Ominous legislation in Congress threatens the future of all hunting with dogs in America. The Anti-Live Animal Lure Act of 1987 (H.R. 1433) would effectively:

- Ban the use of any live animal or bird for dog training.
- Ban water races, field trials, or any other competitive event for hunting dogs in which live birds or animals are used.
- Bring to a standstill a large portion of interstate trade and transport of dogs which have been trained by using live birds or animals.

The bill's supporters say it has two purposes: 1) to put an end to the training of racing dogs with the use of live animals, commonly called "coursing"; and 2) to prevent the use of "teasing animals" in the training of fighting dogs. Dog fighting, of course, is an illegal practice.

Historically, regulation of sporting events involving animals has been relegated to the states. However, this bill would give the federal government regulatory authority over dog training based on the power of Congress to regulate interstate commerce, including any interstate trade, transport, or competition involving any dogs trained by coursing. The penalty for violation is a maximum fine of $5,000 and one year in prison.

The bill, introduced by Rep. Robert K. Dornan (R-CA), would amend the Animal Welfare Act. It has the support of The Humane Society of the United States, the nation's largest anti-hunting organization. Some 50 U.S. representatives are co-sponsors of the measure. It has been assigned to the House Agriculture Committee.

Critics of the bill say it is too loosely written. It defines coursing as an activity that "involves the pursuit by one or more dogs of another animal used as a visual lure; and is conducted for the purposes related to animal training, sport, wagering, or entertainment."

ACTION IS NEEDED BY FIELD TRIALERS AND HUNTERS

The majority of Congressmen do not want this bill to come out of committee, but the only strong response has been from the anti-hunting lobbies. They need to hear from all sportsmen's groups and they need to hear from you. Please call or write your Congressman and any hunting or dog training association you may belong to (such as Quail Unlimited, Ducks Unlimited, National Rifle Association, etc.). To protect our sport, please DO IT NOW!

The following are the Members of the U.S. House of Representatives Committee on Agriculture who now are considering the bill. The Committee's address is: 1301 Longworth House Office Building, Washington, D.C. 20515. Sportsmen should write to Congressman E. de la Garza and ask him not to schedule hearings on the bill and to Committee Members from your state asking them to oppose the bill. The Members are as follows:

Majority Members

E. (Kika) de la Garza, Chairman, Tex.
Walter B. Jones, N.C.
Ed Jones, Tenn.
George E. Brown, Jr., Calif.
Charlie Rose, N.C.
Glenn English, Okla.
Leon E. Panetta, Calif.

Dear Sharyn:

In the November issue of the News you ran a very nice article by Dr. Wayne Taylor of PA regarding Vizslas and the new AKC hunting tests. Wayne predicted there would be Vizsla Masters by Christmas. While his timing was a little off, it's of great significance that no less than THREE Vizslas earned the title of Master Hunter on the same day, April 17, 1988.

On the East Coast it was Dual & Amateur Field Champion Semper Fi Chesty Puller and Dual & Amateur Field Champion Randy Bee's Ramblin' Man. On the West Coast it was Dual Champion Golden Empire's Beauregard CD, VC.

Chesty and Ram became Masters at virtually the same moment in time. Chesty needed a back and Ram needed a retrieve. The retrieving situation was set up and Joe Manning released Ram. Ram went on point and I was told to release Chesty. Chesty started to hunt the birdfield downwind from Ram working toward him. He spotted Ram about 25 yards away and froze with head and tail high. I hurried to his side and Joe flushed the bird. The chukar took off with the wind and it took two shots to down it. The bird fell even with us but about 15 yards to our right. Ram had a long retrieve to make and Chesty had a difficult back to hold as Ram had to pass us to get to the bird. Both dogs handled their respective tasks like the Champions they are! When the retrieve was completed, the back was completed and the breed had its first Master Hunters!

I understand Mike Parks has sent you the details of Beau's accomplishments as well.

What a great day for all of us!

Lucy Lucas

And on that same day in the West...

Am/Mex/Can/Int'l; C.H. Golden Empires Beauregard Am. CD; Mex/ Int'l P.C.; has added another title to his name. That title, from the recently recognized American Kennel Club Hunting Test, as Master Hunter. Beginning in January 1988 at the Master level, Beau was meticulously and exclusively handled by his amateur owner and trainer, Michael W. Parks of Bakersfield, California.

The six year old male received this distinction by qualifying in six consecutive times and becoming the first dog to do so, in the history of the hunting test. In addition to this honor, Beau is also recognized as one of the first Vizslas in America to attain the Master hunting title, tieing with two East coast Vizslas, finishing the same day. With all of his titles, Beau truly shows how versatile this breed is and that it all can be done by amateurs!

DUAL AND AMATEUR FIELD CHAMPION
SEMPER FI CHESTY PULLER OFA 1736
MASTER HUNTER

Owner: Al and Terry Lucas. Handled by Terry
Breeder: Marge Mehagian

Chesty's Other Kids:

E.K. Tripper (Chesty/Charla) 1st Place American Pointer Derby
1st Place Vizsla Michigan Derby

Martinez, CA 94553

Dear Ms. Baker:

Today's mail brought me my copy of Vizsla News for March/April. I was of course happy to receive it, even tho it was a mite late it would seem.

I do wish a bit of information if you don't mind--please look on page 20 of this issue and tell me what is supporting the top half of the lady or the gentleman pictured there with "Mac"---it would appear the bottom half of the person in question has literally vanished into thin air!!!

A little airbrushing is never out of line, but it would appear that this job was only half done---and that the shadows left by the strobe hitting the front legs of old Mac are there, but his hind legs left no shadows at all!!! This is indeed remarkable!!!!!

I have seen some remarkable photos in your magazine---these usually include ladies down on one knee with a Vizsla getting his photo taken by some one who(in getting the dog)cuts the head off the lady who is holding him or her. There is, more often than not, a sign somewhere in the photo which may or may not be in focus, and may or may not be <u>there</u> in its entirety (case in point---same photo, page 20) ----

I am not a photo critic, tho I have been shooting photos for fifty years. I do however shoot cats and dogs--(I am sending you one I took of my Vizsla, Red) and believe me, Ms. Baker, they do not need to look like these shots look. The headless lady holding the "Cowboy" on page 21 is proof one needs not go far to find these atrocities throughout the "News"--- My only hope is that you might someday issue a small list of requirements about the photos you publish---and if the photos do not meet these specs, they don't get in the Magazine, right??

Thanks for your time spent reading this little note---<u>do</u> put your foot down, and make these dog people who seem not to know what they are doing improve the quality of their shots---it would help so much to improve the image of the"News"---the members seem to have no problems castigating each other when some one writes unfavorably about the Vizsla--(pages 14 and 15) surely they will listen to a word of advice about their awful photography!!!

Cheers--

John Clothier, M.D.

NBHA and Judging — a Response

I, like Mr. Toney, (See October 17 issue, page 618) — am a foot hunter. However, I would like to refer to two of our guest speakers at the National meeting this past July in Nashville, Bernie Matthys on the history of field trials, "What is the purpose of a field trial? To improve and upgrade the pointing dog breeds," and the very successful and noted breeder, Ferrel Miller: "When looking for that stud dog, look for more than you want."

I am fifty-three years old and started bird hunting when I was too small to carry a gun and went just to mark singles downed with my father and grandfather. I have hunted chickens and Huns in Saskatchewan, pheasants in South Dakota, ruffed grouse in Minnesota, Wisconsin, and Michigan, and quail from Nebraska to the Yucatan. Wherever I am, give me that driving dog that hunts the available cover. Admittedly, I am lazy, but I want that dog that will allow me to stand on a hilltop and watch him cover an entire creek or river bottom, or if I pull onto an eighty-acre field of cut soybeans, I want to stand at the truck while the dog makes the edge all the way around.

I am not advocating the wild, big running horseback Derby or the all-age dog that constantly has to be "rounded up and brought back" rather the dog that hunts the available cover. Now if that's a half-mile fencerow he should be able to take it, and if no game is found bring himself back to the front.

I will never forget a hot August evening some thirty plus years ago when the greatest bird hunter I ever had the privilege of hunting with, who is now eighty-three years old and still foot hunting, went with me to look at a couple of six-month-old pups I was thinking about buying. After watching these pups in a big rolling pasture dotted with briar patches, he turned to me and said, "Boy, I don't need him, but if you don't want him I'll buy that lemon pup." I thought both pups looked great and asked him, "Why the lemon?" His response was that my eyesight was failing or I did not know what a bird dog was. Again, I said why? He said that the lemon pup hunted everything there was to hunt, from the briar patches to the woodsline a half a mile away. As I said previously this gentleman is strictly a foot hunter and has never been to a field trial in his life, but he knows an outstanding dog.

Please, let's not give our judges the impression that the NBHA championship calibre dog is a "yo yo" type dog and has to be walked three-quarters of the way up a half-mile fencerow or refused to grab that far woodsline. Our dogs should, when cover dictates or on command, come in and "hunt singles," and handle without the benefit of having a scout to bring the dog to the front, but when the opportunity presents itself should "hunt all there is to hunt."

I have talked with many trainers who have no problem bringing a dog in or making him hunt closer. But I am still looking for the man who will tell me that he can take that close or short dog and make him reach!

Chamblee, GA,
—Kent Smith

Please note: The dues for the Vizsla Club of America are $20.00 per single membership and $25.00 per family. When sending in dues for 1988, please remit the appropriate amount.

At her fourth test, Liz made everyone sit up and take notice. Out of a possible 10 in each category, she scored: Hunting 10, Bird Finding Ability 10, Pointing 10, Trainability 9.5

OWNER: DEBORAH FRIDLUND

Field Trial Gun Dog vs. The Hunting Dog

The following article was reprinted from the January, 1984 issue of the "Vizsla Field." It deals primarily with the subject of the all-age dog vs. the gun dog in the sport of field trialing but what it says can be applied to the field trial gun dog vs. the hunting dog. Of particular importance are the paragraphs regarding inheritance and genetic traits in a breeding program. Something to think about when we start talking about replacing AKC field trials with AKC hunting dog tests...

"All-Age vs. Gun Dog"

"What is the point of the all-age dog in the field trial sport today? Is the all-age dog of any importance to the majority of people involved in the bird dog game? How can these apparently wild running creatures, with all their special requirements for training and handling, have any practical value for the average hunter or field trialer?

Why bother with horses, tack, trailer lights that don't work, those long all-night drives, just so that these wide-stepping bird dogs will run in areas safe from car and truck traffic, the neighbor's chickens or goats, or another neighbor's vegetable garden?

Trying to hunt these apparent misfits as youngsters is about as easy as roller skating down a gravel road. All we see of them is the knocking of birds a half-mile down a treeline while a buddy shoots his limit over a coon hound!

The discussion about the all-age dog and the shooting dog has become one of the leading causes of verbal Donnybrooks around the field trial circuit. To address the question, let's first examine the differences between the two types of dogs, then look at why both the all-age and the gun dog are important to the continued prosperity of the various hunting dog breeds and to field trials.

The shooting dog or gun dog is the type of hunting animal that an individual can be comfortable with in the relatively restricted field conditions that exist in many parts of the country today and which prevail for the majority of hunters. It is the type of dog that should have the correct physical ability and aptitude for a day in the field. The gun dog should be biddable, stylish and mannerly on its game.

What is it that separates this type of dog, which is so desirable to the average hunter, from the type of dog so sought by the so-called "lean breed" field trialer, this group comprising the smallest percent of hunting dogs enthusiasts?

First, it is an unrelenting desire to find game. The urge to wander, to hunt, no matter how far, to find game, and the extreme physical ability to go and find it. Tremendous physical capacity, courage and independence, and intelligence highlight the qualities of the true all-age dog. The all-age dog can be looked on as the *extreme expressor* of the same traits we deem desirable in the gun dog.

The special requirements for the training and development and the handling of these special dogs are, what many feel, the biggest downfall of the all-age dog. What is the relationship between the fine gun dog and the all-age dog? The answer, to this writer, lies in the understanding of genetics and its principles of inheritance and variation.

Inheritance is not a simple matter of breeding a dog with a given trait to a dog that displays the same trait then getting exactly the same trait in the offspring. This is especially true when dealing with multifaceted traits that we as bird dog breeders work with, traits of abilities such as stamina and scanting prowess, which are both quite complex genetically."

"Take the pointing breeds—bird dogs—and it is seen that individuals with different degrees of expression of the traits we deem important fall within the normal distribution. The dogs that are the average expressors of specific traits make up the largest percentage; those which are high or low in the expression of a given trait or ability fall into the small percentile bracket at either end of the spectrum. If we look, for example, at the Brittany as a whole and a breed the writer is familiar with, we see that the vast majority of dogs of this breed (most of whose owners have never heard of a field trial) fall into the class of average expressors. We can be proud that the average dog has become synonymous with a fine gun dog.

The next step is to look at what happens when the individuals from the middle portion of this distribution are used exclusively for the breeding of a given breed of bird dogs.

It has been found by many breeders and scientists studying the patterns of inheritance in many different species of animals that when average and low expressors of a trait or combination of traits are used exclusively for a breeding program, the standard quality of those traits will decline after a few generations. This is true even when average individuals represent the far greatest percentage of parents.

Now this is where the all-age dog, as the extreme expressor, becomes important to us.

By choosing individuals which are the extreme expressors, field trialers are creating a select genetic pool into which the breeder of gun dogs can dip to heighten and improve the quality of a trait or a set of traits that may be diminishing or need bolstering in his program. Conversely, the influence of the gun dog can be seen in the stabilization of traits in the all-age dog.

Those who are enamored of the gun dog serve a vital function for a given breed of bird dog — they allow the public to know where the majority of the dogs of a given breed stand.

But the all-age dog also has its place. Criticism of those who enjoy the all-age dog and his performance in the field is unfounded. True, these sportsmen are in the minority because of the special requirements of their avocation. These sportsmen, rather than be exposed to criticism, should be thanked for the extra time and effort and expense involved in developing and promoting the all-age dogs today."

Up Coming in the News

July Membership Issue. Attention all VCA Clubs! This is your chance to let us know who you are and what you're all about. Please send me ASAP a one-page resume (typed would really be nice) including your current officers, (names and addresses) membership person, and a couple of paragraphs about your club. We will run extras of this issue for VCA Secretary Lynne Worth and Membership Chair Susie Goldberg to mail to both new and prospective VCA members. Please do your part by letting those interested in the VCA know where the local Vizsla Clubs are located. Thanks

September - Pre-Nationals Issue Board Agenda Items

Sharyn,
Here is write up on 1988 Midwest Vizsla Field Futurity along with photo.

April 8th, 1988 6th Midwest Vizsla Field Futurity

1st: Mehagian's KRC
Phoenix Fridge
Breeder: Marge Mehagian
Owner: Mark Johnson
Handler: Tony Lucas

2nd: Rebel Rouser Riley
Breeder: H. F. Rozanek
Owner: Bill Fisher
Handler: H.F. Rozanek

3rd: UP-N-Atom
Breeder: Debbie & Tom Hagen
Owner: Bill Elliot & Jim Bush
Handler: Bill Elliot

4th: Mehagian's KRC's Penni Paloma
Breeder: Marge Mehagian
Owner: Marge Mehagian
Handler: Marge Mehagian

Another great day for running dogs. Every dog had plenty of birds.

Temps started in the 50's to 60's during the running and then following the Futurity it turned windy and hot.

Several spectators came out to watch and enjoy the festivities following the trial.

Thanks to Rozanek Kennels and SMA Kennels for donating the exquisite display of trophies.

Some of the top dogs in the country vied for the title. It was too bad that Mark Johnson, owner of the winner, was not on hand to see his performance.

Special thanks to the Eastern Iowa Vizsla Club, Judges Jerry Flynn and Geno Woehrle whose decisions were well taken. Paula Abbott did an outstanding job handling the gallery as marshall.

Thanks
Hank

1988 Midwest Vizsla Field Futurity Winner

RULES AND TRIAL REGULATIONS FOR THE MIDWEST VIZSLA FIELD FUTURITY

The Midwest Vizsla Field Futurity (MVFF) will be held in the spring.

The grounds will be in the Midwest.

Only properly nominated dogs will run in the MVFF and must be registered with either AKC or FDSB.

The course will be a 30 minute single course with no birdfield. Birds will be released on the course. A blank gun and horseback handling are permitted. Dogs may be called back for any reason at the discretion of the judges. Dogs will be run in braces as drawn. If a bracemate is not present to run, then the other dog will run alone.

Bitches in season will be run last.

The MVFF will be judged using derby requirements; all placed dogs must point staunchly.

All placements must be awarded.

Ten to 20 birds will be released before the first brace and three birds will be released before each other brace.

Handlers, handling from horseback, must use their horse strictly as a conveyance only, keeping the horse in a walk at all times. All handlers must seek permission from the marshall or judges before leaving the directed route. Infractions of handling procedures can, if repeated, be grounds for disqualification. The pace of handlers will be set by the judges. The handler may designate a scout. The scout may be used at the judge's discretion.

If the handler or the dog flushes a bird after a point and the bird is within reasonable gun range, then a shot must be fired from a 22 cal. or larger gun.

The judges will be selected by the MVFF. Two judges will judge.

If any dispute arises at the MVFF, the MVFF will have sole jurisdiction.

Judging emphasis is to be placed on dogs that show a keen desire to hunt, are bold and independent, have a fast yet attractive style of running, and demonstrate intelligence in seeking objectives. Dogs should point staunchly and may be called back for a point.

The Midwest Vizsla Field Futurity was established for the purpose of encouraging the owners of vizslas to breed for the highest field standards. A substantial cash prize awarded to both the owners and the breeders of the winning dogs is intended as an incentive for practicing these high breeding standards.

Nomination blanks are available for the asking:
Midwest Vizsla Field Futurity
Route 2 Box 51 A
Schuyler, NE 68661
phone: (402)-352-8769

When a litter is nominated for the MVFF a certificate for each pup will be sent to the breeder to give to the pup's new owners.

Breeders of any litter are strongly encouraged to send the names, addresses, and phone numbers of individuals purchasing pups to the MVFF so that they may receive information about the Futurity.

QUALIFICATIONS AND NOMINATIONS

The dog must be a vizsla.

The nomination procedure is as follows:

A. The litter must be nominated. A litter may be nominated within 90 days of their whelp for a fee of $30. NO LATER NOMINATION OF LITTER PERMITTED.

B. The pup must be renominated. A pup may be renominated prior to its first birthday for a fee of $20. A pup may be renominated within 90 days of its first birthday for a late fee of an additional $20. This is the last nomination required to keep the pup eligible.

C. An individual may nominate his pup out of an unnominated litter by paying $50 within 9 months of the whelping date; this fee includes the first birthday fee.

D. Litters whelped on or after February 1 and on or before January 31 of the following year are eligible for the Futurity held two years hence. Example: Litters whelped on or after February 1, 1986 and on or before January 31, 1987 are eligible for nomination for the 1988 Futurity.

E. If a Futurity nominated pup is sold, then the eligibility is transferable to the new owner just as if the pup had continued in the ownership of the former owner.

F. Entry blanks shall be sent out to the eligible dogs at least 30 days prior to the Futurity date. Entries shall close at 12 noon CST on the Wednesday preceeding the Futurity. The drawing shall take place at 8 pm CST on the Thursday preceeding the Futurity. The entry fee will be $40 and must be paid before the entries close.

PRIZE MONEY AND AWARDS

Four dogs shall be placed with the prize money divided between the first, second, and third placed dogs. The gross purse shall be figured on the basis of all monies received minus expenses. ALL DONATIONS ARE WELCOME AND WILL BE FIGURED IN THE GROSS PURSE. The gross purse less expenses shall be broken down as follows:

50% of purse to 1st place (60% of this to owner and 40% to breeder).
30% of purse to 2nd place (60% of this to owner and 40% to breeder).
20% of purse to 3rd place (60% of this to owner and 40% to breeder).

Trophies go to the owners of placed dogs and certificates go to the breeder.

Handlers paying starting fees will be considered as the authorized agents of the owner(s) of competing dogs and winnings will be paid to such handlers, unless otherwise instructed in writing by the owner(s) prior to the Futurity.

Puppies

Dual Champion Potential • Field Futurity Nominated 1990 • AKC and FDSB Registered

Litter No. 1

There will be some good looking hunters here. Sire: DC Rebel Rouser E T. OFA No. VZ1971 Dam: Cooper's Redneck Dixi OFA No. VZ2710

Due 5-23-88. Ready 7/9/88

Litter No. 2

This litter will need lots of room in the field. Sire: DC Rebel Rouser E. T. OFA No. VZ1971 Dam: Rebel Rouser Desperado OSA VZ2719. Due 6/14/88. Ready 8/1/88.

It costs just as much to keep a good dog as a bad one.

Pedigree on request.

HIGHEST SCORING VIZSLA IN THE MARCH 1988 GAZETTE

SASCO'S ISADORA DUMPLIN CD owned by Ed and Lyn Kahn received a 196 in Open A for Third Place at the K-9 Obedience Training Club if Essex County, New Jersey Trial at East Orange, New Jersey on January 17, 1988.

Winning Ways

Russet Leather Red Feather C.D.

shown completing her C.D. at the Salinas Kennel Club Show. Handler: Bev Wanjon; Breeder: Bev and Ed Wanjon.

Please note: The dues for the Vizsla Club of America are $20.00 per single membership and $25.00 per family. When sending in dues for 1988, please remit the appropriate amount.

OBEDIENCE TRAINING PART II

The following article is the second of three that ran originally in the February, March and April issues of the 1964 **VIZSLA NEWS.**

"The Secret in Training"

"The more I watch or listen to people train their dogs, the more I learn! To watch a dog work perfectly for one member of the family, half-heartedly for another, and not at all for still another can appear a puzzling problem to a novice until he thinks about it just a bit! The principle is the same as with children. You've seen the most well behaved children with one parent who don't even appear to know what the word "NO" means with the other parent. Have you ever stopped to think why? Or ever wondered why a dog or child will obey perfectly one time, and the next time the same person and the same words will produce no action whatsoever? If you listen to the speaker it's really quite simple. THE TONE OF THE VOICE IS THE SECRET! Nearly everybody has heard the owner of a pet or the parent of a child tell their respective pet or child to go play someplace else. After repeating the command two or three times the parent or owner gets mad and amazingly, the next time he says it the child or dog minds. Why? Because he, the parent or dog owner, has reached the end of his "rope". If that command isn't obeyed, he'll follow it with punishment. The tone of voice carried this unspoken threat. The tone of voice is the secret to obedient children as well as dogs!

"Now to stick just to the canine factor in this equation, let us remember that a dog is a very smart animal. Smart enough to know when you mean it and when you probably don't. This usually is when you are too tired, you have company, you are eating dinner or you are too far away. The only time a dog will obey you is when it pleases HIM, a reward is forthcoming, or when he knows that he has no choice in the matter for you will enforce your command. Then the dog obeys. So your tone should convey this conviction EVERY TIME you command anything, or don't waste your efforts.

"I don't advocate commanding in a formal tone every time you want your dog to do something. That's a little too much for everyday life. My suggestion is, leave your formal commands for the times when they are NEEDED and then, if necessary, ENFORCE them immediately every time! This way there is never any doubt when he hears the command "Jack, COME", he knows that means him and now! Around the yard or in the house call "Jack, come here" or "Lie down". Your dog will soon learn that your formal command means DO IT NOW! and your casual command means that it will please you for him to do it but it is not an "or else" ultimatum.

"Always speak with a quiet firm voice. If you yell, the sound is distorted and the conviction is no longer present. Never ASK your dog to do a command, TELL HIM! To sound like you mean it, you must mean it with every fiber of your body. It sounds a bit dramatic but it is very important; if the dog has even the remotest idea that you might be bluffing, he will take advantage of you or at least test your sincerity.

"It isn't too much to ask a dog to live in relation to your actions. A person is silly to assume that because he is a dog, he can do anything he wants. To assume that an ill-behaved puppy will change as he gets older and "settle down" of his own accord is also absurd. Even a puppy can learn enough fundamentals so you can live with him, and as a puppy learns, you begin this tone-of-authority, followed (when necessary) by correction. If learning is started as a puppy, the trials are much easier as the dog grows up. Remember, when you give a formal command, speak it with everything you've got! YOU must take every command seriously if you expect your dog to.

Mrs. Robert J. Coody, Austin, Texas

Will obedience training "cow" your Vizsla? Mrs. Coody will tell you about it in her final article.

CHANGES IN OBEDIENCE REGULATIONS COMING - YOU CAN MAKE A DIFFERENCE

The Obedience Advisory Committee appointed by the American Kennel Club met in February and came up with many proposed changes to the Obedience Regulations which were presented to the AKC Delegates meeting in March and were published in the May Gazette. Letters with comments or suggestions concerning the proposed changes are to be sent to the AKC's Obedience Department by July 15th.

There is not sufficient space to print all the changes here but I will describe the most far reaching ones and I urge you to obtain a copy of the May Gazette and study pages 181 through 184. If any of the proposals disturb you, PLEASE WRITE! When the AKC planned to require dogs to be eighteen months before being eligible for a breed championship and to eliminate the Best of Winners award, the protests from exhibitors all over the country caused the delegates to vote down those provisions. So, if you don't want to see certain changes in the Obedience regulations made official, let them know it. Write and tell the Obedience Department what you do like, too.

Here are major changes being proposed:

1. Lower the jump height from one and one half height of the dog at the withers to one and a quarter in the Open and Utility classes.

2. Allow the dog to enter an advanced class as soon as he has received the necessary qualifying scores in the lower class. The third score must be received before the closing date of the trial in which the entry in the advanced class will be made.

3. Hands and arms of the handler are to swing naturally at the handler's side in all "heel free" exercises.

4. The broad jump exercise in Open classes is to be changed. The handler will walk twelve feet past the lower edge of the first hurdle and stand with his back to the dog. On order from the judge, he will call and/or signal his dog to jump and the dog will clear the boards and go to a sitting position in front of the handler. The finish will be as in the Novice recall.

5. All trials that offer Utility class wil divide it into Utility A and Utility B classes.

6. The Utility group exercise will be eliminated.

7. A new exercise will follow the directed retrieve in Utility. It will be an individual exercise called Moving Stand and Examination. The handler and dog begin as in the Open heel free exercise. At about ten feet, the judge orders "Stand Your Dog" and the handler without pausing, commands or signals the dog to stand, continues ten to twelve feet and halts with his back to the dog. The dog must stand and stay in position. The judge then goes over the dog as in dog show judging except there is no examination of the dog's mouth or testicles. After this examination with the handler's back to the dog, the judge has the handler "Call Your Dog To Heel" and the dog must briskly return to a proper heel position beside the handler.

Again I want to urge you all, if you have any comments on the recommendations for the Obedience Regulations and Guidelines, write NOW to the Obedience Department, American Kennel Club, 51 Madison Avenue, New York, NY 10010 to be received no later than July 15, 1988.

Dear Sharyn and Janis:

It may be too late, but I'm enclosing a copy of a letter we have received from the Manor Care Nursing Center in Dunedin. It related particularly to your upcoming March issue regarding #4 "Programs in Nursing homes with the elderly." This area has a pilot program called Project PUP (Pets Uplifting People) sponsored by the Pinellas County Cooperative Extension Service and I'm also enclosing some other information relating to local Vizsla owners' involvement in this wonderful program.

Hopefully, you will be able to use this information in your March issue.

Best
Marlene

Holiday Drama is Doggone Funny

by Charles McKinney
Sun staff writer

DUNEDIN — Maybe there are some people who think modern theater is going to the dogs.

Well, modern theater literally did just that during a recent holiday drama.

Owners of four Vizslas, medium-sized hunting dogs, decked out their pets in Thanksgiving attire to present "A Thanksgiving Pageant" for residents of Manor Care nursing facility, 870 Patricia Ave.

The players, who veritably romped through the short play, included Elso as a turkey, Clint and Jake as Indians and Rogue, a Pilgrim. The cast was completed by Mike Chambers, son of one of the dog owners, whose role was the "gunner."

While residents were filling the facility's activities room, the canines were in the lobby, but all four had more fun playing than going over their roles.

"We rehearsed once," said Marlene Covill, Elso's owner. "That's enough."

Elso, of course, wagged his tail.

"You're dead," Mrs. Covill told her pet who, upon hearing the voice of his mistress, leaped toward her arms.

The cast was reassembled and Mike fired again. Elso looked at Mrs. Covill, then sat down.

The residents of the facility seemed to enjoy meeting the actors more than they did the drams. The play took about two minutes and the actors' reception about 40.

The group plans to present a Christmas play, too. "I suppose it will be something about Santa Claus and reindeer," Mrs. Covill said.

Clint seemed ready. According to his owner, Penny Haveard, the dog was named for actor Clint Eastwood. Be that as it may, Clint didn't really make anybody's day by his pre-play antics, which included fetching a wood-and-paper tomahawk and running off with it firmly between his teeth. Clint also showed a penchant for hiding beside chairs.

Just before curtain call, Mrs. Covill explained the drama's plot to the audience. "The Pilgrims and Indians have become friends and are out hunting together for the Thanksgiving dinner."

So Mrs. Covill took Elso, the turkey, downwind of the group of Pilgrims and Indians, who began to stalk their prey.

Then Mike lifted his gun (actually a log), pointed it at the turkey and fired.

INSTITUTE OF FOOD AND AGRICULTURAL SCIENCES
BOARD OF COUNTY COMMISSIONERS, PINELLAS COUNTY

Pinellas County Cooperative Extension Service, 12175 125th St. N., Largo, FL 34644 (813) 586-5477

December 4, 1987

Ms. Marlene C. Chumbook
Tampa Bay Vizsla Club
2651 Michael Place, #106
Dunedin, FL 34698

Dear Marlene:

Please relay to the members of the Tampa Bay Vizsla Club a tremendous word of thanks for their involvement in Project PUP activities over the past year. The Thanksgiving Play that you did at Manor Care Nursing Home in Dunedin is just one example of the wonderful service you continuously provide to the local community and to the residents of nursing homes in Pinellas County.

In addition to the "special" events that your club does, two members (Marlene Covill and Mary Durham) make regular monthly visits to nursing homes to visit the residemts and to provide pet therapy to the many persons who would otherwise not have access to animals.

This office and Project PUP just want you to know how much we appreciate your generosity and kindness.

Best wishes for a happy holiday season.

Sincerely,

Judy Yates
County Extension Director

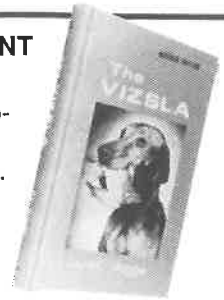
BACK IN PRINT

The book judged best the year introduced by the Dog Writers of America.

THE VIZSLA
By B. C. Boggs



Authoritative, Complete. 390 pages of favorite breed. Full color section. Covers all aspects of working with Vizslas. Essential for every Vizsla owner's library. Can be ordered direct form the publisher for $19.95 plus $2.00 postage and handling.

GLENBRIER Publishing
P.O. Box 546
Jackson, OH 45640

Ohioans please add 5 per cent sales tax

Breeders: We have flyers about this book available. Drop us a line and we'll be happy to send some along to go home with your pups.

Please note: The dues for the Vizsla Club of America are $20.00 per single membership and $25.00 per family. When sending in dues for 1988, please remit the appropriate amount.

TO: The VCA News

FROM: The VCA National Events Revision Committee

The Board of Directors appointed a Revision Committee to revamp the National Events Guidelines. The Committee is presently at work on this project and would like suggestions and opinions from the VCA membership at large. We are considering such things as having the VCA Board of Directors assume the major responsibility for the running of this event. This may require a permanent central site for both show and field events. How do you feel about this? It may mean we should split our week-long event into two series: Spring (National Championship 2 series stake, puppy stake, hunting and versatility tests) and Fall (National Amateur Championship Stake - 2 series - Specialty and the Derby Stake). How do you feel about this?

Let us hear from you. Direct correspondence to the committee chairman: Lynn Worth
P. O. Box 1366
Millbrook, N. Y. 12545

(Linda Kelly has been appointed the new standing National Events Chairman.)

COVERS FOR 1988

The following people have contacted me for covers for 1988. Cover's are assigned on a first come, first serve basis. In fairness to the membership, no one may purchase more than one front cover in a calendar year. Also, no one may purchase more than 3 inside front, inside back, back covers, or a combination thereof in a calendar year. The front of the Stud Dog pull-out and the Brood Bitch pull-out are not considered covers, per se, and are not subject, at this time, to the above restrictions.

Our breeding program strives to produce offspring with exceptional conformation, along with strong hunting instinct and a desire to please. We offer puppies, stud service & grown dogs at times. The accomplishments of our dogs include: High In Trial at the 1983 Vizsla National Obedience Trial, 2 Regional Specialty Winners (littermates), and the #5 Vizsla in the country in 1986.

RESOLUTION
The officers and the Board of Directors — Vizsla Club of America — In cognizance of their respective responsibilities to protect the breed and foster its development, do hereby condemn crossbreeding of pure-breed Vizslas and falsification of registration documents. All persons following the fancy of Vizslas are enjoined to subscribe to this ethic in the best interest of the breed.

RESOLUTION

The Vizsla Club of America calls for all breeding stock to be radiographed and specifies that no dog or bitch with the slightest evidence of hip dysplasia be used for breeding purposes. In keeping with this resolution, the VIZSLA NEWS will not accept ads for any Vizsla as breeding stock that does not have an OFA number. Ads for litters of puppies will not be accepted unless the sire and dam had OFA numbers as of the date of the breeding. OFA numbers must be sent in with each ad request and will be printed with each ad. OFA requirements fo not apply to dogs appearing in news articles or "Winning Ways". Winning Ways may not be more than one half page which may include one picture, name of the dog, name of the owner, name of the breeder, name of the handler, and name of the win. Instructions for OFA diagnosis may be obtained, for a fee, from the Orthopedic Foundation for Animals, School of Veterinary Medicine, Columbia, Missouri 65521.

STUD DOG INDEX

Listings will be updated in January and July
If you have corrections and/or additions, have your copy to the Editor one month prior to the insertion month.

* * * * * * * * * * * *

The following listings do not necessarily constitute an endorsement by the V.C.A. Persons contacting decide for themselves which breeder is most suitable for their purpose. The V.C.A. has resolved that all breeding stock is to be radiographed and that only those dogs and bitches OFA certified free of hip dysplasia be used as breeding stock. Puppy buyers are urged to inquire as the the OFA certification of sires and dams. Breeders listed must be V.C.A. members.

We need another and a wiser and perhaps a more mystical concept of animals. Remote from universal nature, and living by complicated artifice, man in civilization surveys the creature through the glass of his knowledge and sees thereby a feather magnified and the whole image in distortion. We patronize them for their incompleteness, for their tragic fate of having taken form so far below ourselves. And therein we err. For the animal shall not be measured by man. In a world older and more complete than ours they move finished and complete, gifted with extensions of the senses we have lost or never attained, living by voices we shall never hear. They are not brethren, they are not underlings; they are other nations, caught with ourselves in the net of life and time, fellow prisoners of the splendor and travail of the earth.

"A Champion By Design — Not By Chance."

Eukanuba® Can Make The Difference.

Raising a truly great champion or superior hunter is the result of conscious effort, time and money invested by many people. Pride and satisfaction are their rewards.

Successful owners, breeders, trainers and handlers all share their knowledge, experience and the commitment. Working together they assure a dog has every advantage to achieve its full genetic potential. Always striving to obtain results superior to those achieved before. To do this, each of these experts realizes that careful planning, hard work, and superior nutrition are also essential elements required as part of their plan.

That is why, when selecting a food to provide proper nutrition, these experts agree, you can feed Eukanuba® with confidence. The Iams Company has over 40 years of experience preparing nutritionally complete and balanced foods to satisfy a dogs special requirements. High-quality meat protein for body development, quality fat to fuel the athletic body, carefully prepared carbohydrates for quick energy and a balance of vitamins and minerals to assure you that Eukanuba provides all the nutrition a champion will need. 100% satisfaction guaranteed. Eukanuba — nutrition that can make the difference in your dog.
